

GIT AND GITHUB

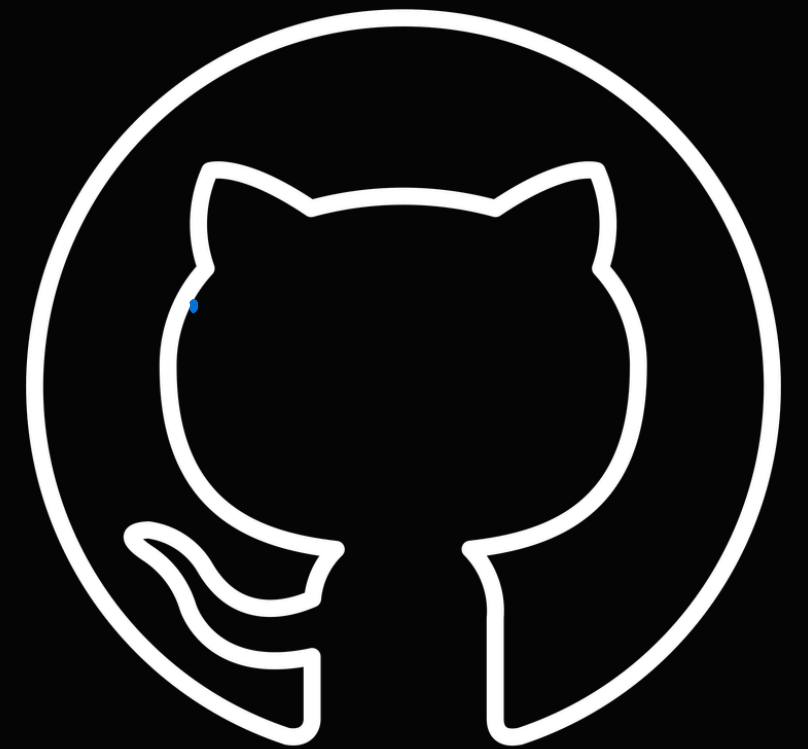

TABLE OF CONTENTS

- **WHY GIT CAME INTO EXISTENCE**
- **WHAT IS GIT?**
- **GIT V/S GITHUB**

- **GIT COMMANDS**

INTERACTIVE SESSION BEGINS

- **EXERCISE 1: CREATE YOUR FIRST REPO**
- **EXERCISE 2: ADD AND COMMIT CHANGES**
- **EXERCISE 3: PUSH YOUR REPOSITORY TO GITHUB**
- **ADD SOME DOCUMENTATION USING README.MD**
- **EXERCISE 4: CLONE TWO REPOS**

BRANCHING IN GIT

SELF HOSTED GIT SERVER DEMO

- **INTERNAL WORKING OF GITHUB**

GIT BEST PRACTICES

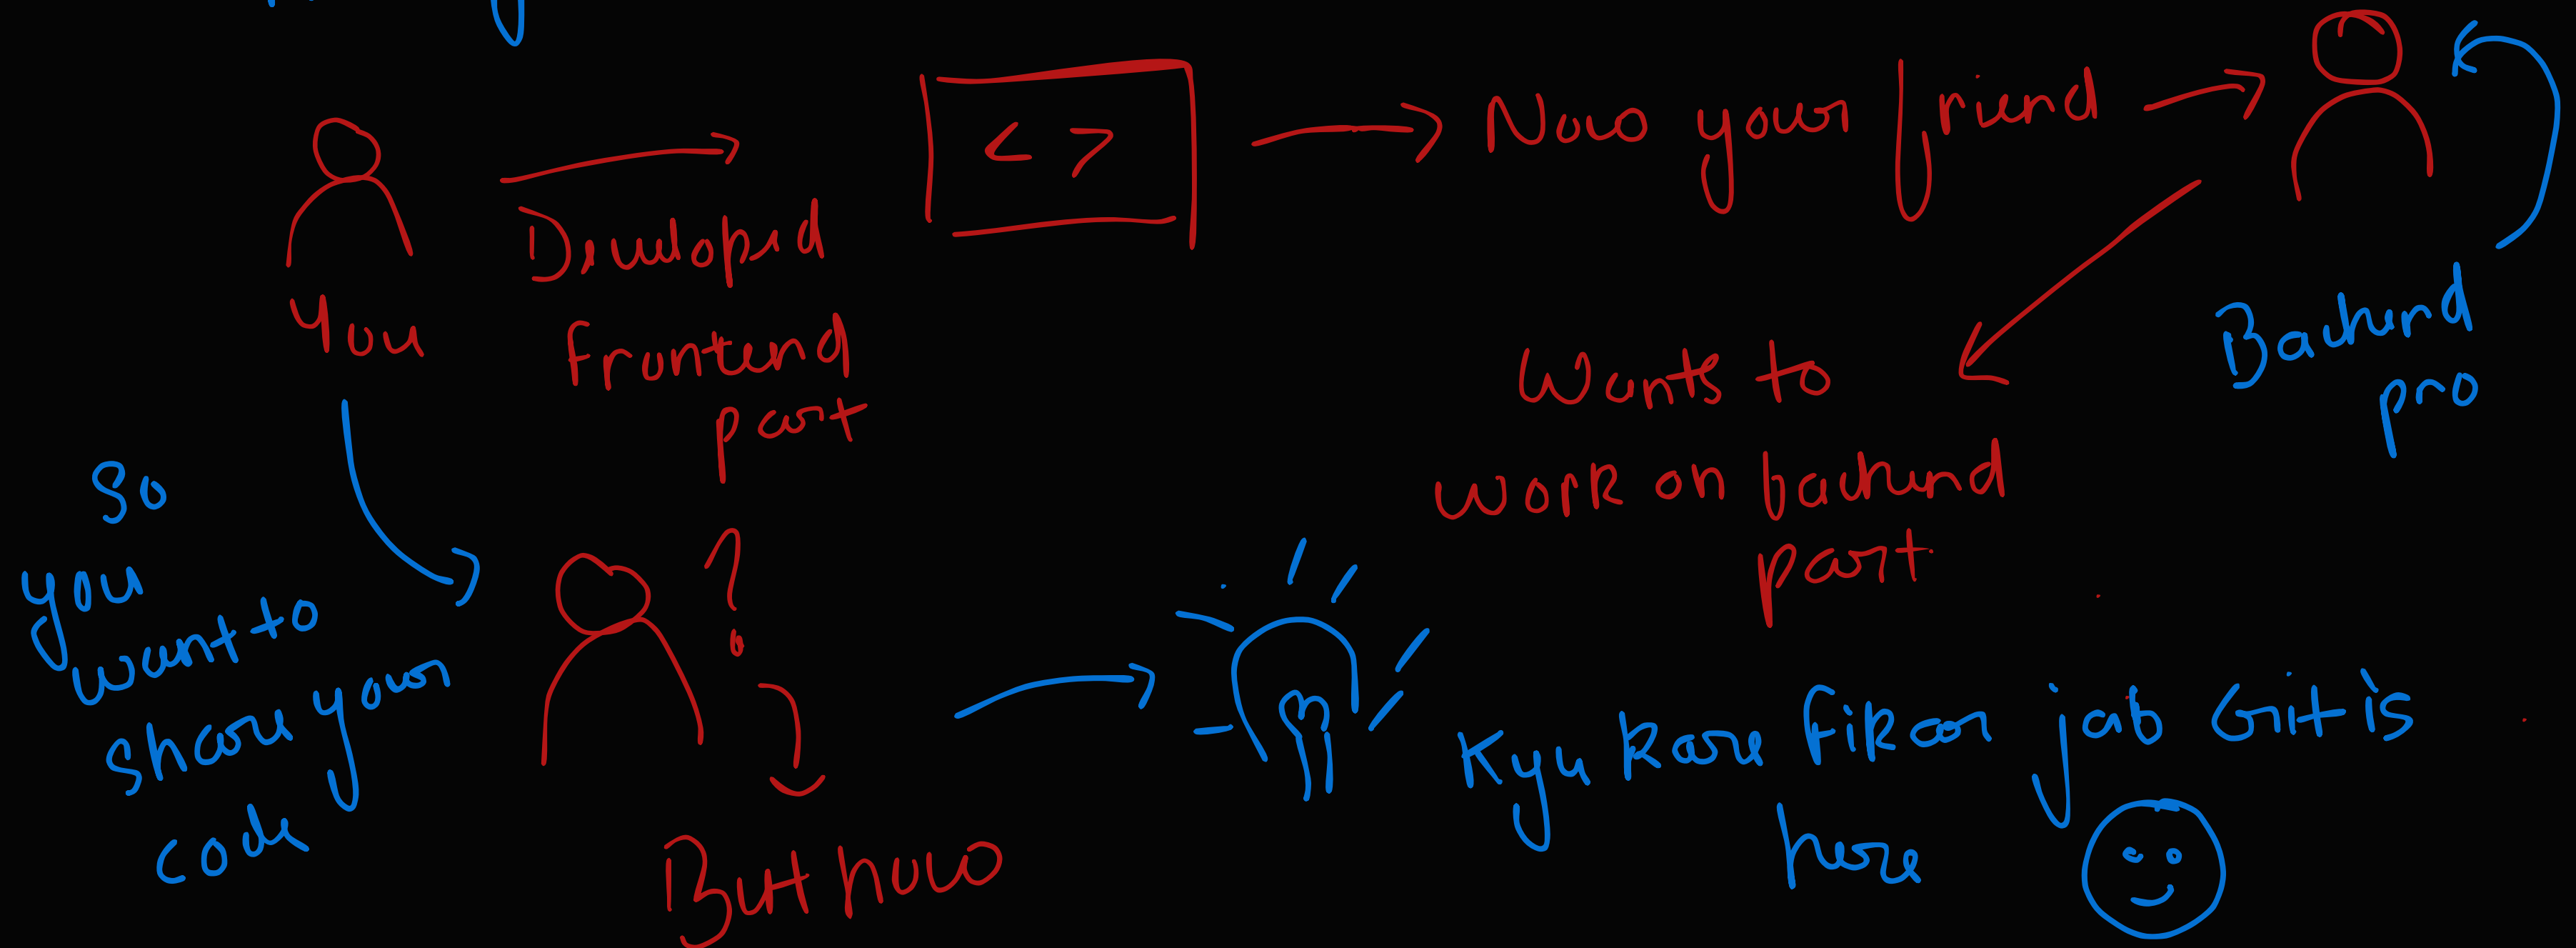

- **SOME OF THE BEST PRACTICES
YOU SHOULD FOLLOW**

YOUR TASK

- **CHALO THODE TASKS KARKE AANA** 😅

WHY GIT CAME INTO EXISTENCE

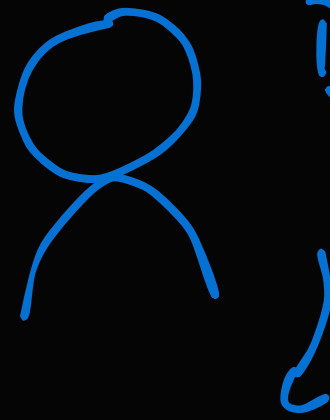

- o Suppose you are in a hackathon

WHAT IS GIT?

Bhaii itna aata
toh DTV me
hota shyd
Thoda smjha to
de

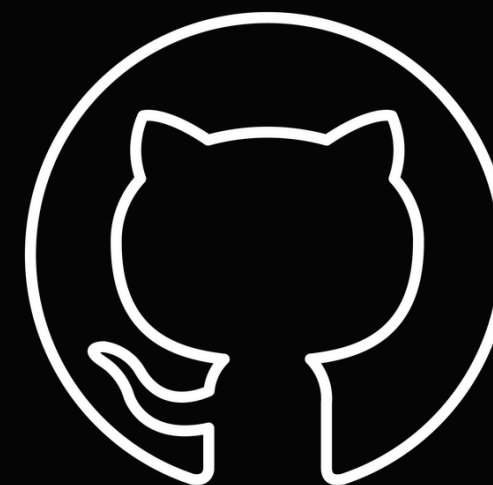

Bhaii chill man, boht
lasy hai

- o So, Git is a open source Version Control System
- o Ab yeh Version Control kya hai?
- o Basically, Version Control System helps in maintenance of versions of code

GIT VS GITHUB

VCS

**PLATFORM WHERE YOU CAN
UPLOAD YOUR CODE AND SHARE
YOUR CODE**

USES GIT INTERNALLY

GIT COMMANDS

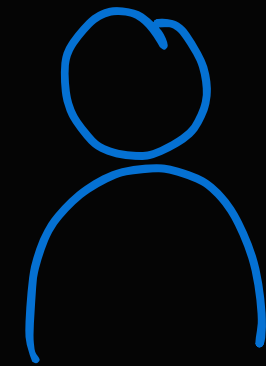

- **STEP 1: INITIALIZE A REPOSITORY: GIT INIT**
- **STEP 2: ADD FILES: GIT ADD OR GIT ADD.**
- **STEP 3: COMMIT YOUR CHANGES: GIT COMMIT -M <COMMIT_MSG>**
- **STEP 4: ADD ORIGIN OF REMOTE GITHUB REPO**
GIT REMOTE ADD ORIGIN <LINK>
- **STEP 5: PUSH CHANGES TO GITHUB**

PRACTICE: CREATE A REPO

PRACTICE: CLONE ANY TWO REPOS

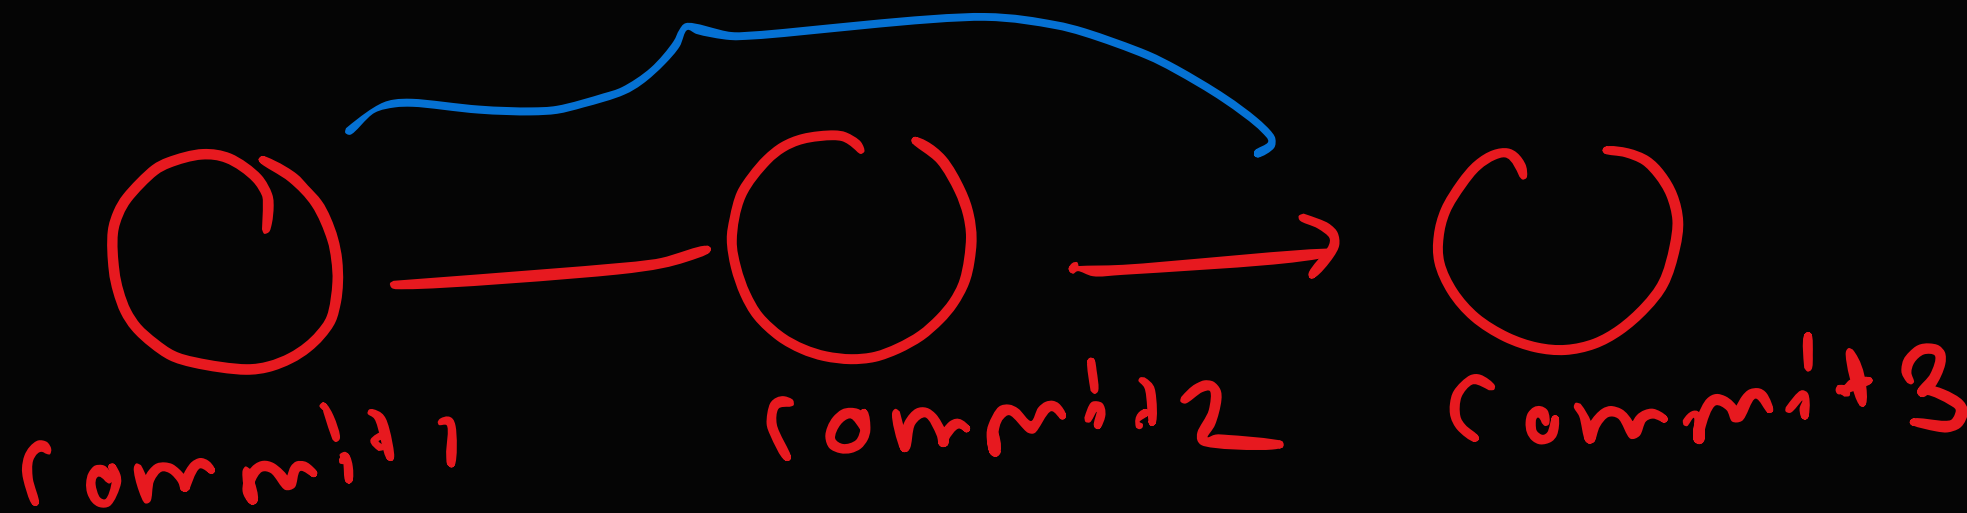

- **USE COMMAND: `GIT CLONE <URL>`**

But khaai
yeh branch
kya hai?

So, jab bhi tum commits
karta ho, to uski chain
banti hai, jise you call
branch

Branch

So in a company, you work in multiple parallel branches

why??

ex: You are building a calculator

Dev2: works on subtraction

Dev1: ○ → ○ → ○ → ○

works on branch 1

where she builds addition function

Git branches

lets you work parallelly in a same project

Bhaii ab to project branching :)

**SELFHOSTED GIT
SERVER DEMO
STARTS**

GIT BEST PRACTICES

- **NEVER ADD VIRTUAL ENVIRONMENT AND LIBRARIES INTO YOUR REPO LIKE NODE MODULES**

ADD IT IN GITIGNORE

- **NEVER ADD .ENV FILE IN YOUR GITHUB REPO**
- **COMMIT MESSAGES SHOULD BE MEANINGFUL**

YOUR TASK

TASK 1: CREATE A REPOSITORY

TASK 2: CLONE A REPOSITORY

AND THAT'S ALL:)

THANKS
